DIVISION MEMORANDUM

No. 338, s. 2022

SEAMEO INNOTECH'S MT4T SURVEY – VISAYAS LEG

To: Assistant Schools Division Superintendents
Chiefs, CID and SGOD
Education Program Supervisors
Public Schools District Supervisors/ DICs
Elementary and Secondary School Heads
All Others Concerned

1. For the information and guidance of all concerned, attached is Memorandum DM-HROD-2022-0433, requesting selected teachers to answer the online survey on Mobile Technology for Teachers (MT4T) Resource Kit. Teacher participants may access the survey thru the link: https://bit.ly/MT4T_Visayas until 11:59 PM on April 22, 2022.
2. Attached is the list of teachers who will participate in the online survey based on the required number per SDO as reflected in Annex 1.
3. The results of the survey are intended to support the dissemination efforts for the Mobile Technologies for Teachers (MT4T) resource kit. MT4T is a set of FREE knowledge products that promote the use of smartphones, tablets, and other similar handheld devices for teaching, learning and professional development of teachers. The resource kit is available at www.seameo-innotech.org/mt4t.
4. Immediate dissemination of and expeditious compliance with this Memorandum is directed.

SUBJECT : **SEAMEO INNOTECH'S NATIONWIDE OPT-IN ONLINE
SURVEY FROM MARCH TO APRIL 2022 ON THE
DISSEMINATION OF THE MOBILE TECHNOLOGY FOR
TEACHERS RESOURCE KIT**

DATE : 28 March 2022

This is with reference to the letter dated 11 February 2022 to this Office from Ramon C. Bacani, Center Director of the SEAMEO INNOTECH, regarding their request for our endorsement of the Center's nationwide opt-in online survey among public school teachers from March to April 2022, which intends to gather data in support of the wider dissemination of the Mobile Technology for Teachers (MT4T) Resource Kit. The MT4T is a set of knowledge products that promote the use of smartphones, tablets, and similar handheld devices for teaching, learning, and professional development of teachers.

The opt-in online survey will be administered using Google Forms and disseminated through social media and email. Around 100 to 200 teacher-participants from each of the 17 regions are required to ensure a representative sample. Upon formal endorsement, the study team will also reach out to the DepEd Regional Offices to enlist their assistance in disseminating the survey.

We hereby endorse the said request to all DepEd Regional Offices for appropriate action. Please be reminded that in the conduct of the survey, the highest ethical standards in research,

such as but not limited to **securing the consent of all respondents and ensuring the participation in the survey is voluntary**, shall be observed.

For further queries, you may directly contact **Mr. Benedict Santos**, Information Management Unit, SEAMEO Innotech, through his email: benedict.santos@seameo.org.

Attached herewith is the letter from SEAMEO INNOTECH Center Director Bacani, along with the Information Note and brochures on the survey, **for your appropriate action**.

Thank you very much.

Enclosures:

INFORMATION NOTE

Nationwide Opt-in Online Survey on the Mobile Technology for Teachers (MT4T) Resource Kit

April to May 2022

Background and Rationale

The MT4T resource kit has been developed to help bridge the gap between teachers who are digital migrants and students who are digital natives. As such, the resource kit is designed to help teachers use and take advantage of technology to support and improve the teaching and learning process, while assisting students in developing higher order thinking skills at the same time. Beyond that, teachers will also find helpful insights and tips on how to leverage technology for their personal and professional development. While technology is a promising feature of 21st century education, it comes not without any risk or threat to the safety and well-being of both teachers and students. In this regard, the resource kit also includes an e-book and a set of teaching materials on digital citizenship and cyber wellness to capacitate teachers in guiding learners to be safe, responsible, and productive online.

It is readily an accepted fact that students use the internet more than most adults – be it for making their learning more holistic, for mere leisure, for keeping in touch, or for doing a mix of all. Given the rapid technological development over the past few years, it becomes imperative that teachers and even school administrators are sufficiently equipped with technological know-how to appropriately guide and nurture the new generation of learners. The need to adapt and to continuously innovate becomes even more critical as we enter a new age of education where information and communication technology (ICT) can make education more accessible – more so in the time of a pandemic.

The MT4T resource kit has the potential to provide educators more confidence in using technology for education as they brave the “new normal.” By assisting them in learning how to take advantage of the potential of technology, teachers will be put in a more conducive position to help deliver the promise of quality and accessible education, especially in these challenging times.

There is a unique opportunity now to amplify the core message of MT4T and get the resources in the hands of those who are intended to benefit from them. However, to expand the reach of the MT4T resource kit, it is crucial to first learn and understand how to best communicate with our target audience. Ultimately, the nationwide survey is meant to provide data and evidence-based insights that will support the wider dissemination of MT4T resource kit and its flagship e-book on digital citizenship.

Objectives

The nationwide survey seeks to achieve the following goals:

- to build profiles of Philippine teachers based on their individual personalities, behaviors, and motivations related to technology use;
- to identify advantages of and challenges in using the MT4T resource kit; and

- to draw data-driven insights that will support the communication and dissemination strategies for the MT4T resource kit.

Methodology

The opt-in online survey consists of five major parts designed to collect data on the participants' (1) basic demographic information, (2) motivation, (3) personality, (4) technology use, and (5) familiarity with the MT4T resource kit. It should take around 15 minutes to complete the survey.

The survey will be administered by batches using Google Forms. However, a Google account will not be required to participate. The link will be disseminated to the target participants through social media and email.

Participants from each batch will be given a week to accomplish the online survey. Any concerns or questions about the survey may be sent via email at _____ or through the SEAMEO INNOTECH Facebook page at _____

Target Participants and Schedule

Public school teachers of every grade level in basic education from all regions of the country are invited to participate in the survey. The survey will be conducted in 4 batches following the indicative schedule below.

	Batch	Schedule
1	NCR and Luzon	April 04 to 08, 2022
2	Visayas	April 18 to 22, 2022
3	Mindanao	April 25 to 29, 2022
4	Open call to all teachers	May 02 to 06, 2022

More details on the survey roll-out will be made available on SEAMEO INNOTECH Facebook page

Raffle

All participating teachers will each have 1 raffle entry for a chance to win a tablet computer and other prizes. Winners will be announced on the SEAMEO INNOTECH Facebook page at the end of the survey period.

More details on the raffle and survey roll-out will be made available on SEAMEO INNOTECH Facebook page.
